

*** Expressions of Interest Sought from New Zealand Growers ***

"..Unless we can leverage NZ expertise, we'll be spending money overseas at the expense of New Zealanders and New Zealand's economy. Collectively, New Zealand's network of underground medicinal cannabis growers hold a vast knowledge. The positive economic impact to New Zealand of unlocking this IP could be profound, and we may create a unique opportunity to leverage this 'secret knowledge' before it is lost to the annals of time. How wonderful if we could identify a safe, legal pathway to blend 'old art' and 'modern science' and bring these long overdue gifts to market.."

- Mark Mees, June 2018

If you want to continue your good work within a legal framework in 2020 helping those in most desperate need then read on..

A BIT ABOUT US

- SETEK is a seed-to-sale medicinal cannabis company and will commence operations late 2019 in Taupo.
- We will be producing 100% NZ certified organic medicinal cannabis products in geothermally heated, next-generation hybrid greenhouses.
- SETEK's grow operation will be overseen by Dr. Mike Nichols, a renowned horticultural scientist with direct knowledge and experience in the research & development of hemp and cannabis cultivation, and 1 of only 42 honorary members of the world's leading independent organization of horticultural scientists; The International Society for Horticultural Science (ISHS).
- Whilst we are exclusively focused on medicinal cannabis right now, we are proud supporters of a legal, regulated recreational market where personal growing and genuine NZ businesses co-exist in harmony.

A BIT ABOUT YOU

- You're not driven exclusively by money, but you expect to realise financial reward for the fruits of your labour and your past sacrifices;
- You want to share your knowledge and experience with the world and get the recognition you rightfully deserve; and
- You recognise that growing and breeding cannabis is both an art and a science, and that scientists and non-academic breeders & growers alike can learn from each other.

*** OUR OFFER ***

- **You'll retain ownership of your IP**
- **You'll get an upfront fee for your genetics;**
- **You'll get ongoing royalties;**
- **You'll get shares in SETEK; and**
- **You'll be offered a paid position on our Social Responsibility Committee**

SETEK will set aside 100% subsidised product for those most desperately in need but with little or no affordability and you'll be offered a paid position on our 'Social Responsibility committee' that will contribute to decisions regarding our product subsidies and the funding of local/regional health-based programmes and initiatives.
